The IEEE International Conference on Visual Communications and Image Processing (VCIP) is one of the flagship conferences of the IEEE Circuits and Systems Society's Visual Signal Processing and Communications Technical Committee. Since 1986, VCIP has served as a premier global forum for sharing advances in visual communication, image processing, and multimedia technologies.

VCIP 2026 will continue this legacy by providing a fertile environment for researchers, engineers, and practitioners from both academia and industry. The program will include oral presentations, poster sessions, plenary talks, special sessions, and tutorials, encouraging in-depth scientific exchange and collaboration.
